

TRAVERSING PERSONNEL GANTRY FOR RAIL MAINTENANCE FACILITY

SPECIALTY SOLUTION #140

TRANSPORTATION/RAIL

- 2,000 lb. capacity, hydraulic actuation, 120" vertical travel at 40 fpm
- Fall restraint assembly straddles the railcar attaching to both lifts. While the fall restraint bar is inserted, the lift is electrically interlocked to prevent it from traversing horizontally
- Safety features on this model include fixed guard rails, kick plate, fall restraints, manual lowering valve, checker plate flooring and audible alarm

Handling Specialty custom engineered and manufactured two custom personnel lifts to be used by a major Canadian railcar manufacturer in the maintenance and repair of rolling stock.
