

Handling Specialty has developed a global reputation for successfully delivering custom engineered material handling systems to a wide range of industries.

Power Generation

Handling Specialty combines best-in-class engineering, manufacturing and controls integration to create state-of-the-art turnkey solutions to help our clients increase productivity, improve safety and reduce operational costs. We provide creative solutions to manufacturers of large assemblies such as engines, gen-sets, transformers, turbines, rotors and compressors. Providing unique solutions for complex material handling challenges in the Power-Gen industry aligns very well with Handling Specialty's core competencies and proven capabilities.

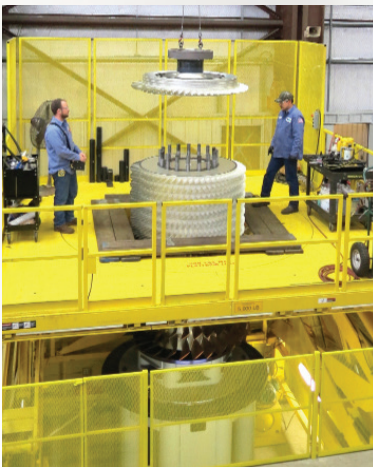

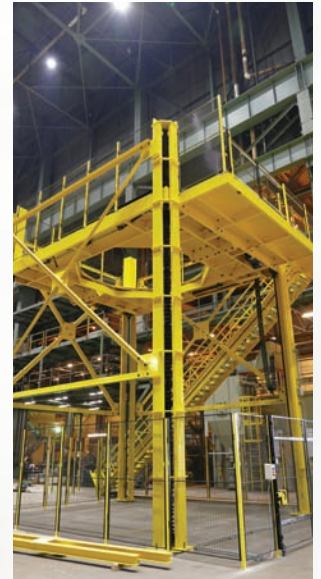

Handling Specialty's highly skilled work force and relentless commitment to quality delivers creative solutions, robust equipment, turn-key installations, onsite training and long-term professional support.

As an engineered-to-order solution provider, you can be certain that Handling Specialty works with all stakeholders to ensure that the equipment is designed, manufactured, tested and installed to exceed the specific application requirements for each project.

We Build Big Things to Help our Customers Build Big Things

Custom Applications

- Adjustable Work Platforms & Personnel Lifts
- Large Capacity Transporters
- Automatically Guided Vehicles (AGV)
- Manually Guided Vehicles (MGV)
- Pit Mounted Lifting Systems
- Tilters, Rotators, Rollovers & Up-Enders
- Custom Work Positioners
- Production Duty Scissor Lifts
- Vertical Assembly Platforms
- Four Post Electro-Mechanical Lifts
- Multi-Axis Lifting Systems
