

Handling Specialty has developed a global reputation for successfully delivering custom engineered material handling systems to a wide range of industries.

Rail and Transportation

Handling Specialty combines best-in-class engineering, manufacturing and controls integration to create state-of-the-art turnkey solutions to help our clients increase productivity, improve safety and reduce operational costs. When design/building for the rail/transportation manufacturing and MRO operations, we provide creative solutions to manufacturers of locomotives, freight cars, monorails and transit systems as well as for maintenance, repair and overhaul activities at heavy rail, light rail and transit workshops throughout the world.

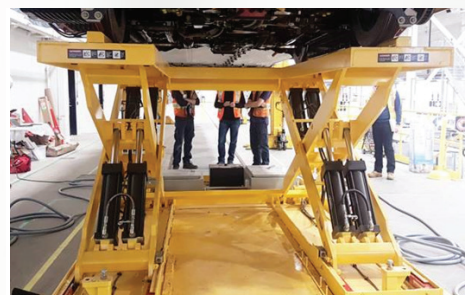

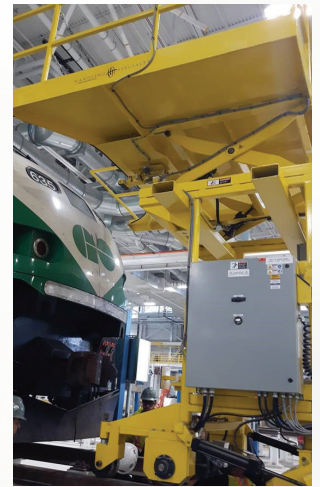

Handling Specialty's highly skilled work force and relentless commitment to quality delivers creative solutions, robust equipment, turn-key installations, onsite training and long-term professional support.

As an engineered-to-order solution provider, you can be certain that Handling Specialty works with all stake holders including engineering and construction firms, owners and operators to ensure that the equipment is designed, manufactured, tested and installed to exceed the specific application requirements for each project.

We Build Big Things to Help our Customers Build Big Things

Custom Applications

- Drop Tables
- Split Rail Systems
- Portable Electric Jacks
- Transfer Tables
- Turntables
- Self-propelled personnel lifts
- Paint booth personnel lifts
- Traversing Gantries
- Personnel Lifts
